Splash Screen/Register:

Users open the application with the splash screen being the starting point of the application.

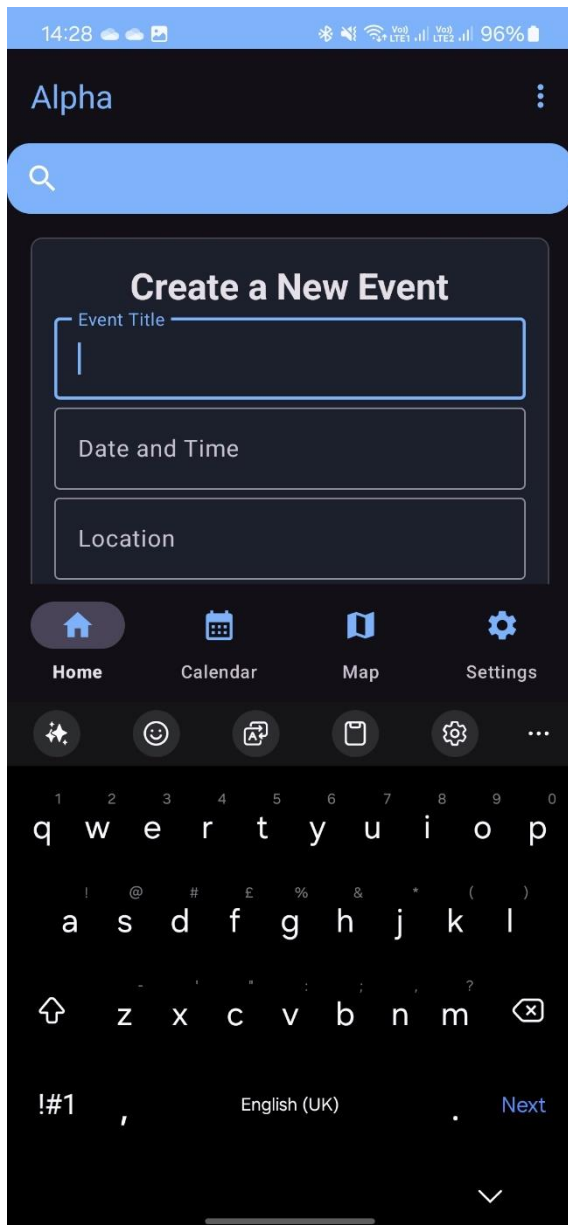

Users can register using their email address as well as creating a password.

Users can choose to sign in with their Google accounts.

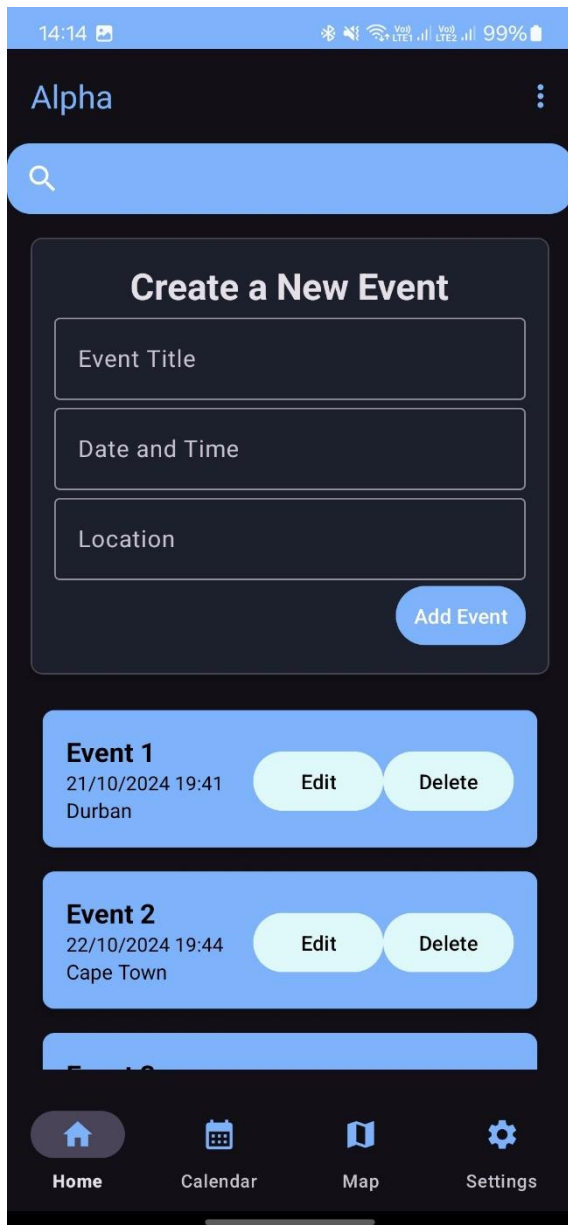

Login:

If the user already has an account, they can choose to login from the register screen which brings them to the login screen.

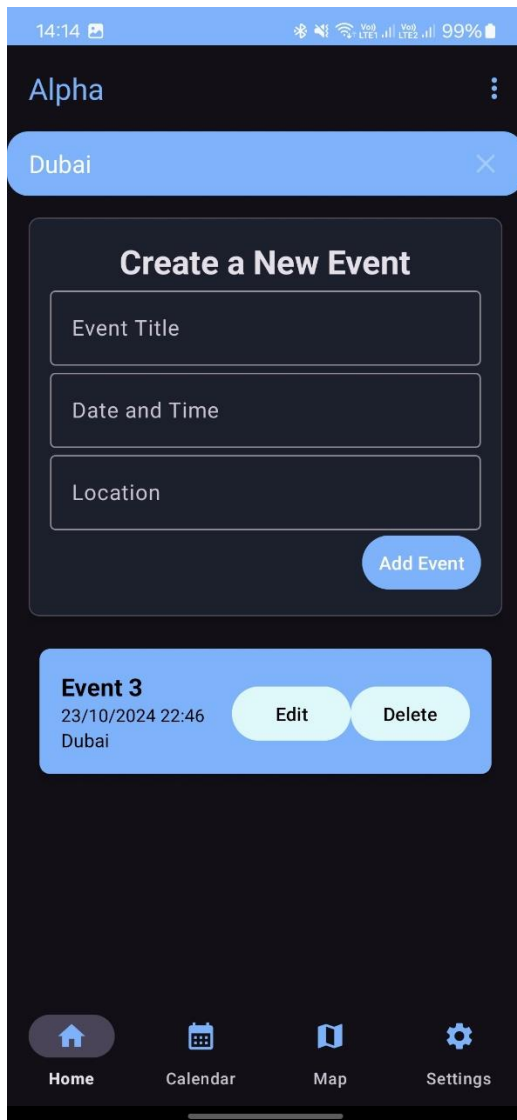

Home Screen:

Once the user successfully logs in they are brought to the home screen which allows them to create an event, search for an event, edit an event or delete an event.

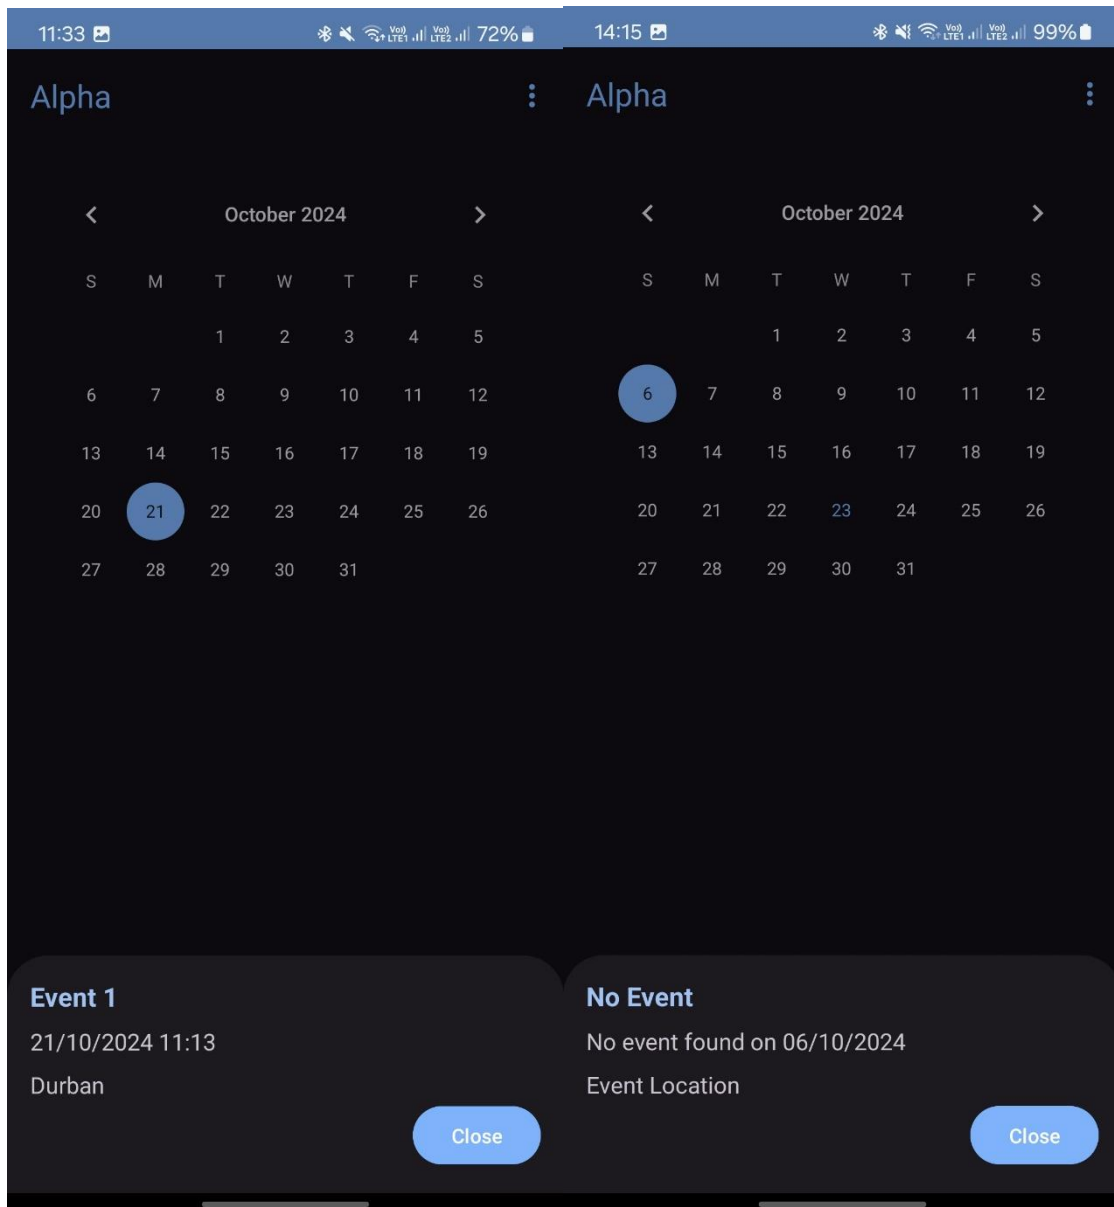

Event Created:

When the event is created is it then displayed as an upcoming event, as mentioned in the previous screen users can create, edit and delete an event.

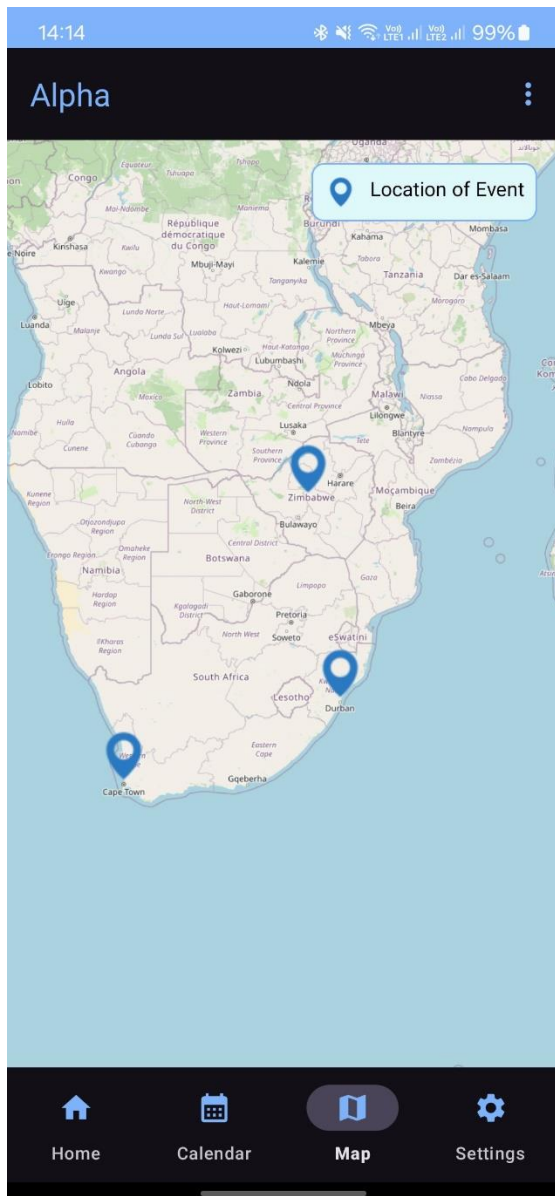

Search Functionality:

Users can search through the event list which will filter upon typing key words such as event name or location as well as the date and time.

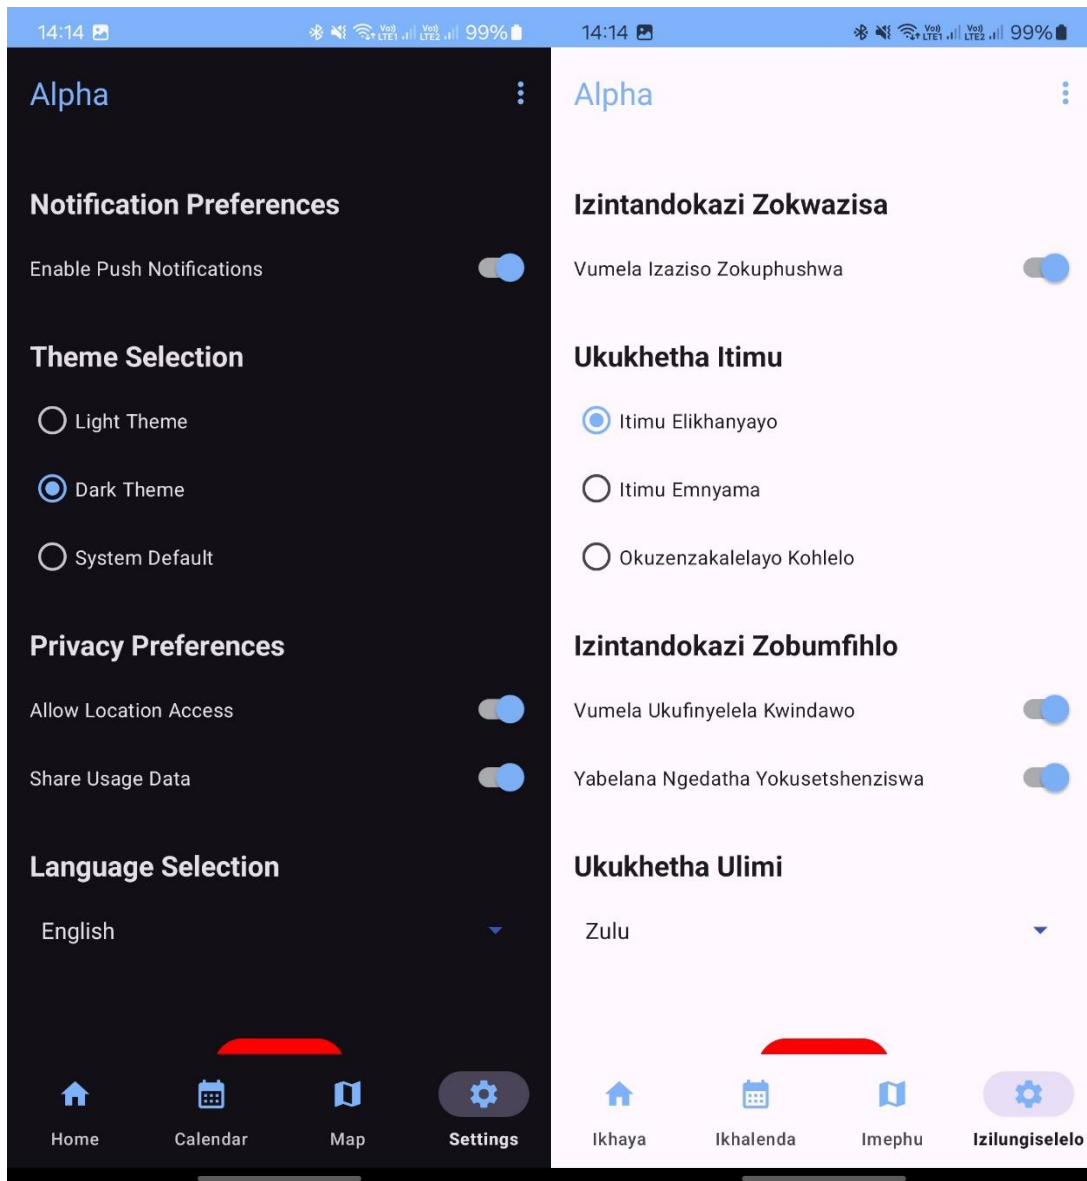

Calendar Screen:

Users have the ability to view events from the calendar screen by selecting on the date it was created it will show up as an upcoming event, if there is no event it will display with no event details on selected date.

Map:

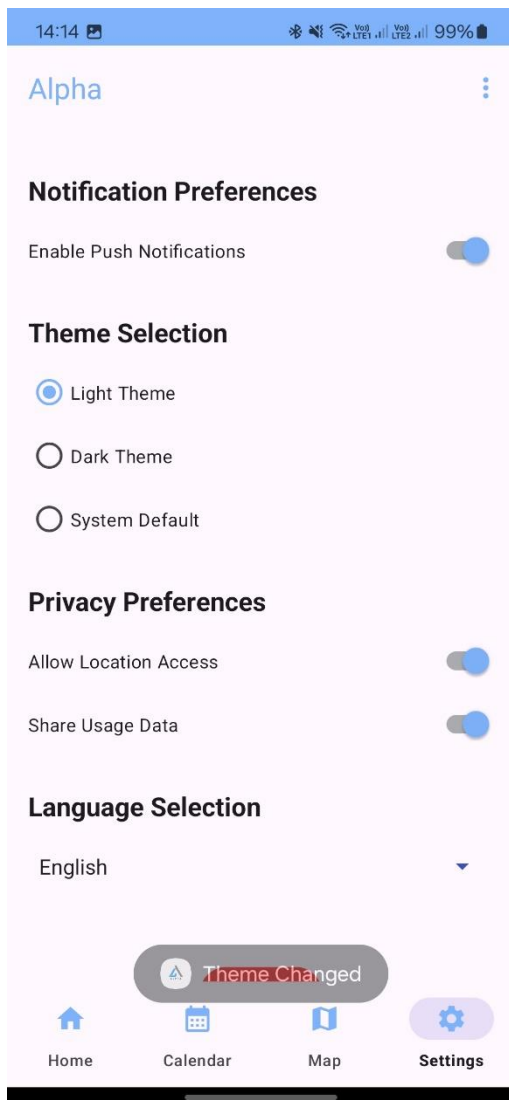

Once the user inputs the location of the event upon event creation, it is automatically located onto the map with the event title.

Setting Screen:

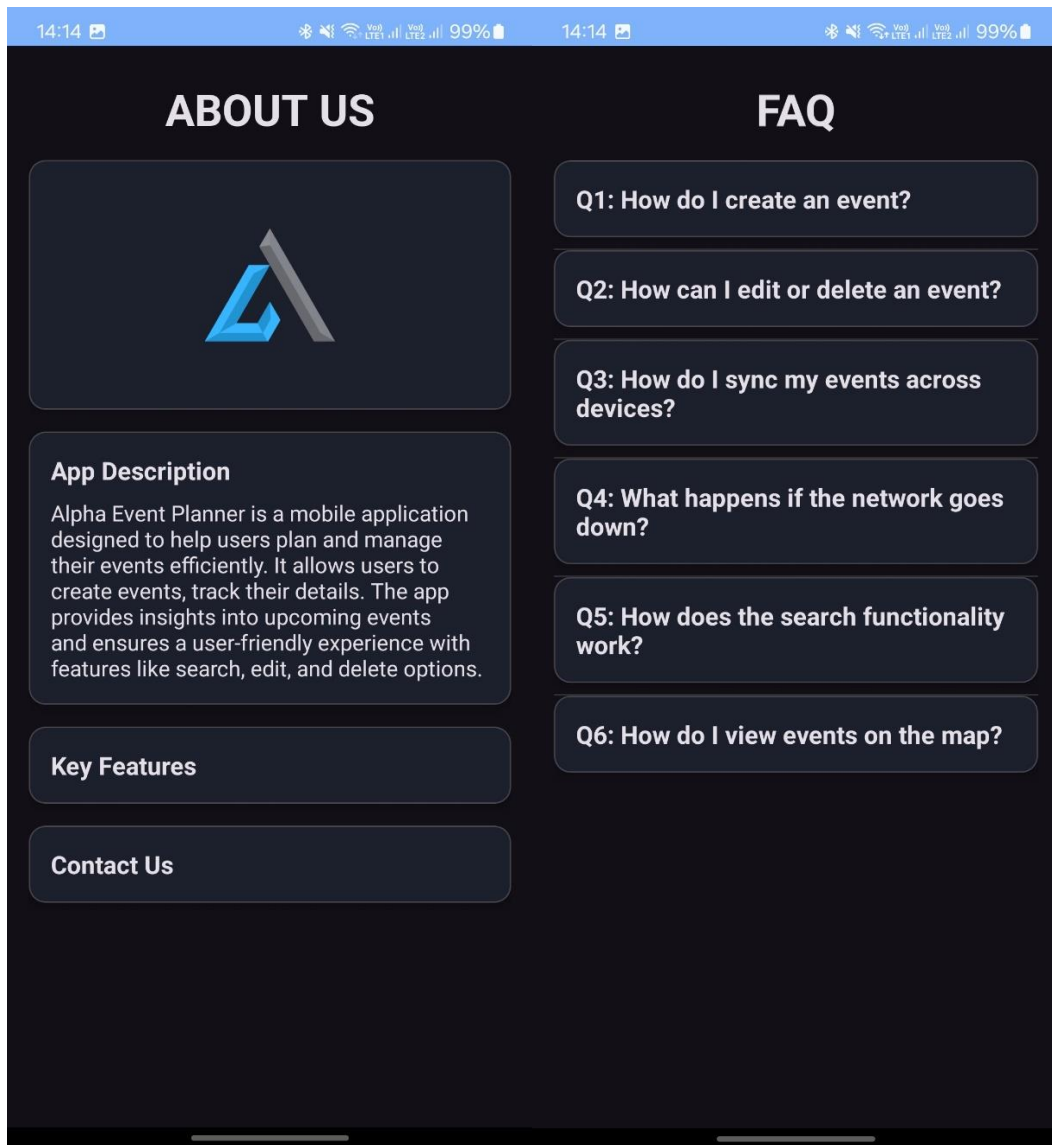

Users have the option to customise their experience (Language etc) in the settings screen.

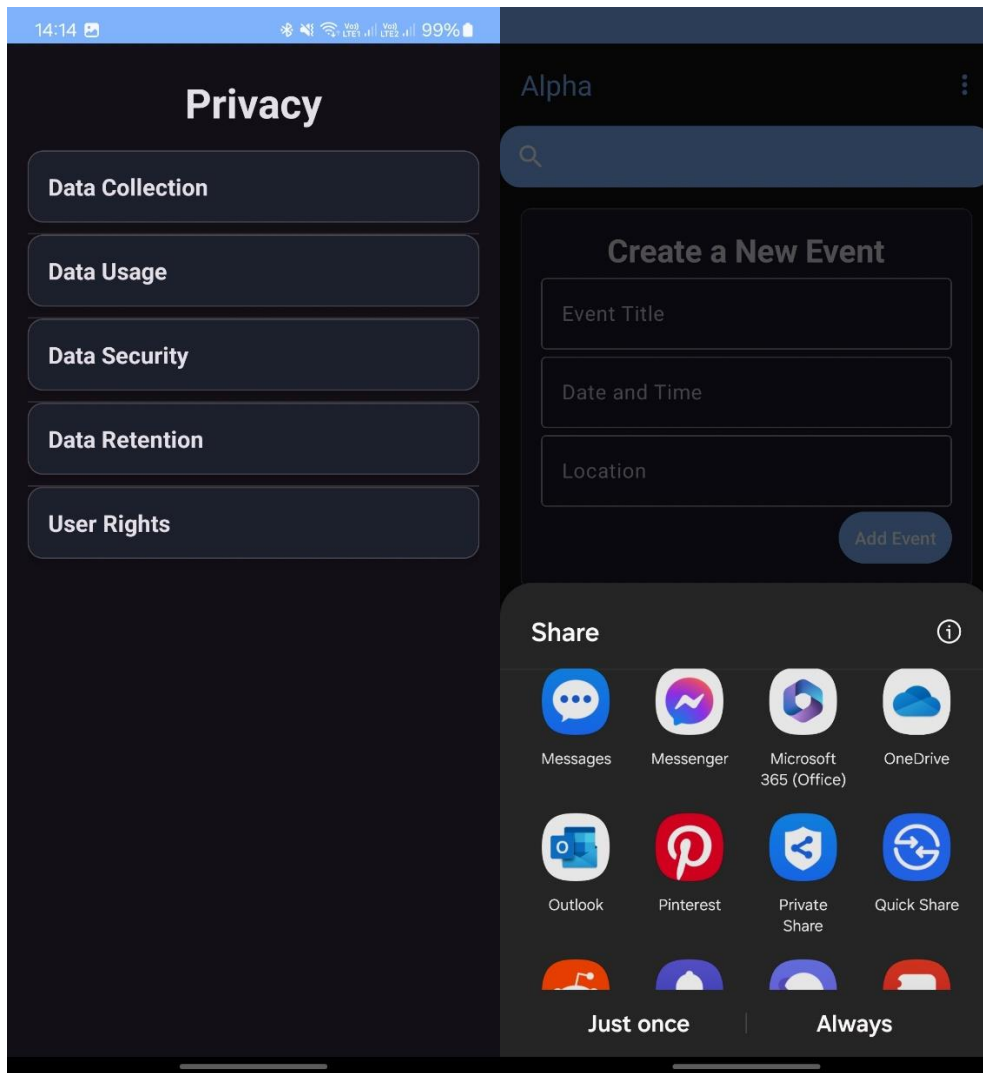

PS: Once the user logs out, they are redirected to the login screen.

Light Mode:

When the user selects a theme, the application will change them upon selection.

Action Menu: (3 dots)

This menu includes the About Page, FAQs, Privacy Policy and Share Feature.
